Is property to be served adjacent to Company line? \_\_\_\_\_

If not, attach a copy of the easement providing for lines and agreement for water service from an off-site meter (FORM A-4).

**Other Comments:** \_\_\_\_\_

The Applicant expressly agrees that Lazy H Mutual Water Company (“Company”) is not responsible for damage occurring from excessive or low pressures. Pressure regulators are required by the Company at the customer's expense on Company's side of meter if the pressure at the meter location exceeds 150 psi. Customers are urged to install pressure regulators on their side of the meter also. This will protect against possible excessive pressure, which could occur from time to time.

All meters shall be set within the Company's right-of-way. The Applicant's property must adjoin the Company's pipeline easement. If this is not the case, the applicant must present documentary evidence (such as a recorded easement) showing that applicant has received legal permission to cross another parcel or parcels in order to connect to the Company's main.

Water and assessment bills are issued monthly near the first of the month. Payment is due and payable upon receipt and considered delinquent after 2:00 p.m. on the last working day of the month of issue. A delinquency charge will be added to the balance due if received late. If payment is not received by the last working day of the month following month of issue, the meter will be shut off. A turn-on charge, plus any other bills due on all customers' accounts must be paid along with a deposit to reestablish credit before resumption of service. The Company is not responsible nor guarantees the quantity or quality of water to its customers.

Applicant consents to abide by ordinances, rules and regulations as prescribed from time to time by the Board of Directors, including all rates of tolls, charges and provisions for the collection thereof. The Company reserves the right to determine the maximum meter size for any connection.
